

Hand-drawn diagram of a concrete slab section showing reinforcement details. The diagram shows a cross-section of a slab with a top layer of reinforcement bars (labeled 15) and a bottom layer of reinforcement bars (labeled 14). A vertical line indicates the centerline (CL) punch outs at 8-inch increments, with a note "CL punch outs @ 8" increments see detail FIG 3A & FIG 3B". Dimensions are given as 8', 12', 16', & 20' increments. The vertical axis is labeled "cmu increments".

8', 12', 16', & 20' increments

CL punch outs @8" increments
